By: James Massey

EXPLANATION:

CAPITALS INDICATE LANGUAGE ADDED TO EXISTING RESOLUTION

Strike through indicates language deleted from existing Resolution <u>Underlining</u> indicates language added to Resolution by Amendment

Double Strike Through indicates language stricken out of Resolution by Amendment.

WHEREAS, Section 505 of the Charter of Cecil County requires the Executive to prepare a 1 2 Proposed Capital Improvement Program as part of the Budget Message to County Council for the ensuing fiscal year not later than April 1 of each year; and 3 4 WHEREAS, on April 1, 2016 the County Executive submitted the proposed Capital 5 Improvement Program for Fiscal Years 2017–2021 to the Cecil County Planning Commission for its review and consideration; and, 6 7 WHEREAS, the Cecil County Planning Commission has recommended that the Capital 8 Improvement Program for Fiscal Years 2017–2021 be approved; and 9 WHEREAS, on April 1, 2016 the County Executive submitted the proposed Capital 10 Improvement Program for Fiscal Years 2017–2021 to the County Council indicating the plan of the County to receive and expend funds for capital projects, and providing for each capital 11

WHEREAS, the Cecil County Council has met all the requirements to consider the Capital Improvement Program for Fiscal Years 2017–2021.

project, the project description, estimated costs and probable sources of funding; and,

NOW, THEREFORE, BE IT RESOLVED BY THE COUNTY COUNCIL OF CECIL COUNTY, MARYLAND that the Capital Improvement Program for the fiscal years ending June 30, 2017, June 30, 2018, June 30, 2019, June 30, 2020, and June 30, 2021, attached as Exhibit A, is approved and adopted.

AND BE IT FURTHER RESOLVED, that this Bill shall take effect on July 1, 2016.

Appendix D-1 CAPITAL IMPROVEMENT PROGRAM

The following is a list of projects within the FY 17 Approved Capital Budget:

	FY 2017	Paygo
Cecil County Public Schools		
Perryville Elementary Renovation	2,543,000	
Bo Manor Middle/High School Boiler Repl.	600,000	
Kenmore Elementary School Boiler Repl.	490,000	
Cherry Hill Middle School Boiler Repl.	697,000	
Thomson Estates Elementary Boiler Repl.	574,000	
Gilpin Manor Elementary Replacement	4,113,000	
Cecilton Elementary School Exterior Env.	348,000	
New Chesapeake City Elementary	900,000	
Cecil College		
Instructional Technology	577,000	
Mechanical Infrastructure	506,000	
DPW - Roads and Bridges		
Replacement of Bridge CE-0072 Razor Strap Road over Stony Run	600,000	
Razor Strap Road Improvements Phases I & II	500,000	
Racine School Road Improvements	2,500,000	
Oldfield Point Road Improvements (Old Chestnut to Old Ferry)	1,000,000	
Replacement of Reservoir Road Culverts	450,000	
Replace Star Route Road Culverts (2)	50,000	
Lums Road Street Improvements (Bouchelle Road to Little North East Creek)	700,000	
Replace Bohemia Church Road Culverts (3)	275,000	
Replacement of Bridge CE-0042 Mechanics Valley Road over CSX	600,000	
Parks and Recreation		
Calvert Regional Park - Development	913,000	
Information Technology		
BTOP - Broadband Initiative	580,000	
Permitting System	50,000	
Wastewater Enterprise Fund		
Construct Principio San. Sewer North	2,200,000	
Construct Rt. 40 West Sanitary Sewer	100,000	
Replace CSX Sewer Line @ Red Toad Rd	500,000	

Note: The funding source for the project will be bond, paygo or grant depending on the financing plan at the beginning of the project. FY17 has no scheduled paygo.

Cecil County Public Schools

Bohemia Manor Middle/High School Boiler Replacement

The existing heating plant serving this facility consists of two (2) equally sized oil fired fire tube boilers rated at 50 BHP (1,670,000 BTUH) each. The boilers were manufactured by Cleaver Brooks and are twenty-two (22) years old. Scope includes replacing existing with two (2) new 80 BHP Cleaver Brooks fire tube boilers with enhanced efficiency as well as upgrading approximately 100 terminal controls (variable air volume (vav) boxes, unit heaters).

Kenmore Elementary School Boiler Replacement

Kenmore Elementary School is heated by a central hot water heating plant. Heat is generated by two (2) oil fired scotch marine fire tube style boilers. The boilers were manufactured in 1984 by Cleaver Brooks, Model CB 50 Boiler Horse Power (1,670,000 BTUH). Fuel oil is stored in an underground 10,000 gallon tank. The existing boilers are thirty-one (31) years old and are standard efficiency (80 - 82%) non-condensing style boilers with a 5:1 turndown ratio. Each boiler was sized for approximately two-thirds (2/3) of the entire building load. They also utilize a more expensive, less clean fuel source in #2 fuel oil. It is recommended that the two (2) existing oil fired boilers be replaced with four (4) equally sized 1,500,000 BTUH nominal capacity vertical fire tube gas fired high efficiency condensing boilers. Additionally a boiler sequencing controller is recommended and for it to be interfaced with the existing Johnson Controls Energy Management System. The existing underground fuel oil tank, fuel oil pumps and piping is recommended to be removed in its entirety. Also, the existing domestic water heater and master mixing valve will need to be replaced with a high efficiency gas fired condensing style.

Cherry Hill Middle School Boiler Replacement

Cherry Hill Middle School is heated by a central hot water heating plant. Heat is generated by two (2) oil fired scotch marine fire tube style boilers with propane pilots. The boilers were manufactured in 1967 by Cleaver Brooks, Model CB 100 Boiler Horse Power (3,340,000 BTUH). Fuel oil is stored in an underground 10,000 gallon tank. The existing boilers are forty-eight (48) years old and are standard efficiency (80 - 82%) non-condensing style boilers with a 5:1 turndown ratio. They also utilize a more expensive, less clean fuel source in #2 fuel oil. Natural gas is available to the building. It is recommended that the two (2) existing oil fired boilers be replaced with six (6) equally sized 1,500,000 BTUH nominal capacity vertical fire tube gas fired high efficiency condensing boilers. Each boiler shall be provided with an automatic isolation valve so they can be sequenced in lead lag fashion and rotated daily. Additionally a boiler sequencing controller is recommended and for it to be interfaced with the existing Johnson Controls Energy Management System. The existing undergrounds fuel oil tank, fuel oil pumps and piping is recommended to be removed in its entirety. Also, the existing domestic water heater and master mixing valve will need to be replaced with a high efficiency gas fired condensing style.

Appendix DI Detail Approved

Thomson Estates Elementary School Boiler Replacement

Thomson Estates Elementary School is heated by a central hot water heating plant. Heat is generated by two (2) oil fired scotch marine fire tube style boilers with propane pilots. The boilers were manufactured in 1975 by Cleaver Brooks, Model CB 100 Boiler Horse Power (3,340,000 BTUH). Fuel oil is stored in an underground 10,000 gallon tank. The existing boilers are forty (40) years old and are standard efficiency (80 - 82%) non-condensing style boilers with a 5:1 turndown ratio. Each boiler was sized for the entire building load so one boiler functions as a standby. They also utilize a more expensive, less clean fuel source in #2 fuel oil. Natural gas is available to the building. It is recommended that the two (2) existing oil fired boilers be replaced with four (4) equally sized 1,500,000 BTUH nominal capacity vertical fire tube gas fired high efficiency condensing boilers. The boilers also allow the building to be converted to variable primary flow thus enhancing operational efficiency during partial load conditions. The existing heating water pumps are recommended to be replaced in kind utilizing high efficiency inverter duty type motors which complies with IECC and controlled by a variable speed drive. Additionally a boiler sequencing controller is recommended and for it to be interfaced with the existing Johnson Controls Energy Management System.

New Chesapeake City Elementary School – Land Acquisition

Built in 1939, Chesapeake City Elementary once served as the area's high school. In time, the higher grades were moved into a new location, and in 1972 the school received a single story addition of 12,000 sf. This addition was designed in the "open classroom" format and is currently a difficult teaching environment. Chesapeake City is also one of the last schools in the county that is not completely air conditioned and it does not meet current ADA conditions, as it does not have an elevator or accessible rest rooms. The building occupies 2 locally-owned relocatable classrooms and currently has limited resources for media, data networks, music and art. The building's steam boiler is vintage 1939 and presents inconsistent heating control reflecting in safety concerns and indoor air quality issues. Studies are being conducted to determine other possible building locations in the area where water & sewer are available. It is intended to build a new replacement school on a less restrictive site.

DPW - Roads and Bridges

Replace Bohemia Church Road Culverts

This project consists of replacement of three (3) existing culverts that have deteriorated with new culverts along with minor drainage, site work, and roadway improvements. Culverts XCE1073, XCE1074, XCE1075.
