Project Form **Cecil County Capital Improvements Program 2020**

Agency/Department: Cecil County Public Schools	Project Number: 71251
Project Title: Gilpin Manor ES Replacement	Project Location: 203 Newark Avenue, Elkton
Project Description/Status: Priority: 1	

Gilpin Manor was built in 1952 with additions in 1954, 1980 and 2005. Even with the recent kindergarten addition, this building is not serving effectively as an elementary school. It was originally built to be a special education facility. As such, classrooms were built smaller than current state standards for primary classrooms. The gym, kitchen and cafeteria are undersized for the current population, with no space to enlarge them. Admin. and core areas are also too small. Mechanical and electrical systems need to be upgraded. HVAC upgrades in the existing building will be difficult to accomplish due to the low floor slab to roof deck height. Windows and exterior masonry are also in poor condition. ADA issues need to be addressed. This project is also intended to increase capacity of the school. A feasibility study has been conducted, and provides justification for building a new school at the west end of the campus, then demolishing the existing building. New construction is more cost effective than the alternative of renovating and adding on the existing building.

Project Form **Cecil County Capital Improvements Program 2020**

Agency/Department: Cecil County Public Schools	Project Number: 71261
Project Title: New Chesapeake City Elementary School	Project Location: curr. 214 Third Street, Ches. City
Project Description/Status:	Priority: 8

Built in 1939, Chesapeake City Elementary once served as the area's high school. In time, the higher grades were moved into a new location, and in 1972 the school received a single story addition of 12,000 sf. This addition was designed in the "open classroom" format and is currently a difficult teaching environment. Chesapeake City is also one of the last schools in the county that is not completely air conditioned and it does not meet current ADA conditions, as it does not have an elevator or accessible rest rooms. The building occupies 2 locally-owned relocatable classrooms and currently has limited resources for media, data networks, music and art. The building's steam boiler is vintage 1939 and presents inconsistent heating control reflecting in safety concerns and IAQ issues. Studies are being conducted to determine other possible building locations in the area where water & sewer are available. It is intended to build a new replacement school on a less restrictive site.

Project Form **Cecil County Capital Improvements Program 2020**

Agency/Department: Cecil County Public Schools	Project Number:
Project Title: Perryville High Field House	Project Location:
Project Description/Status:	
Priority:	

Perryville High is the only high school out of the five located in Cecil County that does not have a field house, otherwise known as a support services building. The standard field house supports the physical education program but also many sports programs that are after-school related. A field house would allow for the appropriate locker rooms for home and away teams, storage for equipment, and supporting rest rooms for the public during an event. The field house was not constructed during the original building construction in 1978. The building construction would be a simple rectangle with a sloped roof and concrete slab placed on the site in an accessible location.

Project Title:
BMHS Interior Water Line

Project Location:
2755 Augustine Herman Hwy Ches City

Project Description/Status: **Priority:**

The existing main domestic galvanized interior water line at Bohemia Manor High School is in need of replacement. It was installed when the school was built in 1958. The average life span of galvanized water line is 20-50 years. The school was on a well with iron in it for most of the life of the pipe. A water softener was installed but did not prevent all iron from getting into the system. The iron is coming off the sides of the pipe and now that the water line is connected to the Arden area, the iron is coming off the sides of the pipe and leaving iron desposits in the fixtures. A replacement utilizing a copper pipe has been recommended for a life span of 50+ years.

Project is funded.

Project Title:
PVHS Boiler Replacement

Project Location:
1696 Perryville Road, Perryville MD

Project Description/Status: **Priority: 3**

Perryville High School is heated by a central hot water heating plant. Heating hot water is generated by two Cleaver Brooks Model CB Series oil-fired fire-tube style hot water boilers. Currently, the boilers are 100,000 Btu/hr in size, at 200 boiler horsepower (6,695,800 Btu/hr) each and were installed in 1976. Fuel oil is stored in a 10,000 gallon above ground storage tank located adjacent to the boiler room. The boilers are original to the building, and are past their useful life. Domestic hot water is currently generated by utilizing the heating water system. It has been confirmed that a BGE gas line is installed in the street adjacent to the school. It is recommended that Cecil County Public Schools install four (4) new high efficiency gas-fired condensing boilers, each sized at 2,000,000 Btu/hr. The existing domestic hot water storage tank be removed and two (2) new domestic hot water heaters be installed in its place. The new boilers shall be provided with Johnson Controls DDC building energy management components of the school's 4-pipe heating and cooling central plant that was replaced in 2010. The existing components are not recommended to be replaced at this time. If no other equipment is fed from the tank, it is also recommended that the tank, fuel oil pumps, and associated piping be removed entirely.

Project is funded.

Agency/Department: Cecil County Public Schools	Project Number: 71266
Project Title: Providence Special School Roof Repl.	Project Location: 3035 Singerly Rd., Elkton
Project Description/Status:	Priority: 6

Providence School is a single story school with classrooms that were built in 1923, 1939, 1947, and 1954. Part of the school was destroyed by a fire that destroyed the wood joist rafter construction with the remaining section being repaired with a check on masonry construction. The shingles and underlayment on the asphalt roof were last replaced in 1993. Funding for this project is to replace the entire existing roof to replace asphalt shingles with new asphalt shingles and to replace the existing flat two-ply roof with a new tapered two-ply roofing system.

Project is funded.

Project Title:
Rising Sun Elem. Boiler Replacement

Project Location:
500 Hopewell Road, Rising Sun

Project Description/Status: **Priority:** 7

Rising Sun Elementary School is heated by a central hot water heating plant. Heating hot water is generated by two York Shipley Model SPWV Series oil-fired fire-tube style hot water boilers. Currently, the boilers are of equal size boiler horsepower (1,339,160 Btu/hr) each and were installed in 1991. Each boiler is housed in a 10,000 gallon underground storage tank located adjacent to the boiler. The boilers are 25 years old and are at or over their expected median life. Associated boiler circulation pumps, expansion tanks, chemical feed pumps, and fuel oil pump set are also 25 years old and are past their useful life. It is recommended that Cecil County Public Schools replace the boilers in the existing heating plant. Associated heating water pumps, expansion tank, chemical feed pumps. The new boilers shall be integrated into the existing controls DDC building energy management system. The remaining components of the school's 4-pipe heating and cooling central plant that was replaced in 2011 are in good working order and are not recommended to be replaced at this time.

Project is funded.

Agency/Department: Cecil County Public Schools **Project Number:** Cherry Hill Middle School - 2535 Singerly Road Elkton, MD

Project Title: Cherry Hill MS Doors & Windows **Project Location:** 2535 Singerly Road, Elkton, MD

Project Description/Status: **Priority:**

The scope of work is to replace all exterior glass and glazing, with the exception of the courtyard, including abatement and temporary protection. Existing punched opening windows are approximately 2'W x 7'2"H and in groups of 2 or 4, assuming removal of precast perimeter band and masonry piers between windows. Cut sill down approximately 3 brick courses. Window to fill entire opening. Metal panning at perimeter of opening. New brick sill on exterior and solid surface sill on interior for 52 windows. Existing storefront to be replaced in its entirety (2) locations adjacent to the gym and (1) at the main entrance). assuming structural framing members will be covered by the glazing system and that new hollow metal doors will be installed to structural members with continuous hinges. Replace all 45 exterior doors. Doors, other than those in storefronts, include frame and borrowed light replacement. An allowance to remove and reinstall acoustical ceiling at select locations and miscellance floor repair is included. Miscellaneous other work to include pan over existing false louvers at the gym, install thermal film on the glazing at the courtyard, window treatments for the classrooms and admin., electronic locksets, card readers and power supplies for 10 doors (head end by others), and install EX/EM lights with remote heads at all exterior door locations.

Agency/Department:
Cecil County Public Schools

Project Number:

Project Title:
North East Middle School Add/Renovation

Project Location:
200 East Cecil Avenue, North East

Project Description/Status: **Priority:** 9

This building was originally constructed as the town's high school in 1932. Two additions have been made and in 1973 the building was converted into a middle school by adding 11,500 square feet and doing interior renovations. However, the renovation at that time did not completely replace all systems. For example, the boilers are still original to the building. A complete renovation of the entire existing building outside of the newly remodeled areas is needed. Mechanical and electrical systems need to be replaced or upgraded. Asbestos containing materials need to be removed and all systems need to be brought up to current codes and standards. The building is not fully sprinklered, nor is it fully ADA accessible. The school is currently over capacity and enrollment is projected to increase.

Agency/Department: Cecil County Public Schools	Project Number:
Project Title: Thomson Estates Elementary Renovation	Project Location: 203 East Thomson Drive, Elkton
Project Description/Status:	Priority: 12

This school was built with an open classroom configuration and vaulted wood plank ceilings. While partitions have been added where possible, circulation areas cannot be created without reducing classroom count. Without acoustical ceilings, noise transmission is a real challenge to delivering effective education. HVAC equipment is located in joists and a safety harness must be worn just to change filters on some units. The recent addition of an acoustical ceiling in the cafeteria made a huge improvement to noise levels in that space. This project will address converting the rest of the school into a more conducive learning space.

Agency/Department: Cecil County Public Schools		Project Number:							
Project Title: Kenmore Elementary School Add/Ren		Project Location: 2475 Singerly Road, Elkton MD							
Project Description/Status:		Priority: 10							
<p>This project is to address issues at two adjacent elementary schools located in the center of the county. Kenmore Elementary School is currently over capacity and has been nearly as long as it has been open. The use of three exterior portable classrooms has been the method of offsetting the issues related to enrollment. Adjacent to Kenmore Elementary School is the enrollment district of Leeds Elementary School. Leeds was constructed in 1968 and has served a rural community in the center of the county. The most notable characteristic of the school is that it is on a well and septic system that would be very costly to renovate and replace. The project is to renovate Kenmore Elementary and add additional seat capacity to allow for the closure of Leeds Elementary and the redistricting of both areas into one school. Leeds Elementary would be taken out of service per COMAR and turned over to the County as surplus.</p>

Agency/Department: CECIL COLLEGE	Project Number: 70032
Project Title: MECHANICAL/BUILDING INFRASTRUCTURE	Project Location: North East and Elkton Campuses
Project Description/Status:	Priority: 3

Various mechanical components and building infrastructure within College facilities have exceeded their standard life cycle and/or replacement parts are no longer available to repair units. These mechanical systems are critical to the building operating systems and conservation of energy. The 2020 CIP Request includes the following components: Replacement of roofs for Arts & Sciences and Technology Center; ongoing development of the stormwater retention pond; HVAC systems improvements, and; investments in campus sustainability projects, leveraging the College's work with the MEA. The projected need for future years (2021-2025) is based on deferred maintenance projects, scheduled replacements and other energy savings initiatives and have been updated in the ten-year Campus Master Plan.

Agency/Department:
CECIL COLLEGE

Project Number:

Project Title:
CAMPUS ENTRANCE AND FACILITIES BUILDING

Project Location:
North East, MD

Project Description/Status: **Priority:** 1

Construct a new 16,127 gsf / 12,095 nasf Facilities Management Building (FMB) and demolish the existing building, expand parking and construct a new multi-lane entrance and roadway to connect the northern section of campus to the academic core. The existing FMB, built in 1978, is undersized for current operations (less than 6000 GSF) and lacks the technology infrastructure necessary for today's facility operation needs. It is also in the middle of a prime parcel of land necessary for expansion of the campus and needs to be relocated to a more appropriate location. Utilizing the footprint from the existing FMB, the College will then be able to add approximately 200 parking spaces to the northern section of its campus. In addition, creating a new entrance/roadway at the northern end of the campus will enable the College to address the numerous life-safety problems surrounding access for emergency vehicles, provide safer access for tractor trailers and other delivery vehicles and resolve the traffic congestion of the current single lane entrance/exit.

Agency/Department: CECIL COLLEGE		Project Number:		Map Location 
Project Title: COLLEGE CENTER & CAMPUS DEV. - Phase 2		Project Location: North East Campus, North East MD		
Project Description/Status:		Priority:		
<p>Phase 2 consists of a new College Center building that includes a "one stop" for all student services functions. These services will be housed on the first two floors of the new College Center facility and will serve the College's growing student population by providing the following services: Admissions, Advising, Bookstore, Career Development, Registration, Financial Aid, Food Service, Student Government and Activities Offices, Health Services and Conference Center. The third floor of the College Center will consolidate the administrative functions of the College in one location. The spaces vacated by this consolidation (Community Cultural Building A, amongst others) will be renovated into instructional and instructional support space under a separate, future project. The new College Center is proposed to be approximately 62,000 gsf.</p>

Project Form **Cecil County Capital Improvements Program 2020**

Agency/Department:
Cecil County Public Library

Project Number:
72018

Map Location

Project Title:
North East Branch Library

Project Location:
North East

Project Description/Status: **Priority: 1**

The need for a new library in North East is at the critical stage. The current North East Branch, 2,800 sq.ft. is far too small to serve one of the county's largest communities with 26,000 citizens. A 3.5 prime acre site in the middle of this community was purchased in June 2015 with state and county funds. Design funds were allocated in FY18. A contract for A/E services has been awarded and design has commenced. The new two-story library is planned to meet MD's minimum standard for this size community--30,000 sq. ft. public library space--as well as LEED Silver Certification. An additional 15,000 sq.ft. will allow CCPL to relocate its headquarters operation space from the Elkton Library, thereby benefitting the two largest Cecil County communities with one project. The Elkton Library is CCPL's busiest branch and serves a community of comparable size. It is 25,000 sq. ft. and is crowded with users, services, and materials, and the current headquarters operations space. By moving CCPL's headquarters operations from Elkton to the new branch, the Elkton Library can significantly expand. Construction related cost estimates for this project are updated and based on current costs for library and similar construction in Maryland. Library "opening day" collection costs of \$563,000 are included. State competitive grant funding will be sought and estimates are shown below.

Cecil County Public Library

Project Number:

Map Location

Project Title:
Elkton Conversion of staff and public space

Project Location:
301 Newark Ave Elkton

Project Description/Status: **Priority:** 1

The project will convert approximately half of the 4,000 square feet of administrative headquarters operation space to public use space in the Elkton Library. The Elkton Library currently lacks study rooms, workspace and study tables with electrical access, and sufficient space for children's service, all of which are in high demand at CCPL's busiest branch with over 800 visitors daily. The planned expansion of the parking lot by 100 spaces in FY19 is expected to significantly increase usage of the branch and demands for more space. The conversion allows for the addition of state-of-the-art study rooms, additional public meeting and workspace, greater electrical and data access, and significant expansion within the children's room. To maximize the amount of floor space in the children's room for more early literacy activities, the room's layout will be reconfigured to remove staff workstations from the public area and replace the oversized children's reference desk with a smaller, more functional service desk. CCPL will apply for State matching grant funds. Funding for additional equipment and furnishings may be sought from the Friends Foundation of CCPL.

Agency/Department: DES	Project Number: 50050
Project Title: P25 Dispatch migration - Phase I	Project Location: Elkton, Md
Project Description/Status: Cecil County Communications is reaching its 10th anniversary since installation. The radio system itself is scheduled for a changeover to the P25 technology (Project 25). Project 25 (P25 or APCO-25) is a suite of standards for digital radio communications for use by federal, state and local public safety agencies in North America to enable them to communicate with other agencies and mutual aid response teams in emergencies. In this regard, P25 fills the same role as the European Terrestrial Trunked Radio (TETRA) protocol, although not interoperable with it. The current EDACS system will no longer be supported after 2014. This expenditure is a transformation of the dispatch center and backup center to P25 ready. It is a first step towards the conversion of the entire system to P25.	
Priority: 1

Agency/Department: DES	Project Number: 50050
Project Title: P25 Dispatch migration - Phase III	Project Location: Elkton, Md
Project Description/Status: Cecil County Communications system is comprised of 1500 user units. The portable, mobile, and base station radios provide the direct communication between personnel and dispatch. The current user units are nearing end of life and are original to the system. The replacement P25 units will provide multi frequency use and incorporate the MdFirst 700 mhz system into Cecil County. This is of paramount importance to our interoperability with surrounding jurisdictions. Cecil County is surrounded by two states and two Maryland counties all on different radio frequencies.

Agency/Department: DPW-Roads/Bridges	Project Number: 52637
Project Title: Upgrade Nottingham Roads Facility	Project Location: 193 Harrisville Rd., Colora
Project Description/Status:	Priority: 1

This project previously removed a portion of the existing combined administration and vehicle storage building, and constructed a separate administration building and two bay vehicle/shop storage building. This project will replace an existing remaining deteriorating vehicle and equipment storage building with a new building. The project will use the design/build delivery method and will require preliminary design, permitting, and architectural code analysis prior to project advertisement. The awarded contractor will be required to complete the design and permitting that will remove the existing building and foundations, construct a new building, improve drainage, provide ventilation and maintain minimal heating to prevent the equipment from freezing conditions. The project will also include placing an emergency generator on the site.

Agency/Department: DPW-Roads/Bridges	Project Number: 52707
Project Title: Replace Belvidere Road Culvert	Project Location: Perryville, MD
Project Description/Status: Priority:	

This project consists of the emergency replacement of a culvert on Belvidere Road. The existing corrugated metal culvert pipe has deteriorated and partially failed and is at risk of a complete failure, which would likely result in a slope failure and/or the failure of the road bed, thus closing the road, thus making this project urgent. The existing culvert is under 15 feet of fill on what is a very busy County road, with a fairly high volume of truck traffic. The culvert is located just north of the GE Appliance and Distribution Center and Perryville Cold Storage off of Belvidere Road.

Agency/Department: DPW-Roads/Bridges	Project Number: 52645
Project Title: Rehabilitation of Bridge CE0096 Bethel Church Road over Stoney Run	Project Location: North East, MD
Project Description/Status:	Priority: 7

This is a single span steel beam bridge constructed in 1968, has an overall length of 60 feet, and clear roadway width of approximately 27 feet. The bridge is currently not load posted and carries 889 vehicles per day. The concrete bridge deck has had extensive repairs over the years and the underlying original concrete deck is showing advanced deterioration resulting in several closures for concrete deck repairs. The project will replace the concrete deck and make it an integral (composite) with the steel beams, replace the substandard concrete and steel bridge railings, and upgrade the approach w-beam and end treatments, and includes miscellaneous steel repairs.

Agency/Department: DPW-Roads/Bridges	Project Number: 52594
Project Title: Oldfield Point Road Improvements (Old Chestnut to Old Ferry)	Project Location:
Project Description/Status:	Priority: 8

This project includes roadway widening and reconstruction, improving horizontal and vertical alignments, constructing a bridge at Jones Creek and additional six (6) culverts, and onsite and offsite stormwater management facilities, utility relocations, and offsite stream and wetland mitigations. The project limits are on Oldfield Point Road from Breon Lane at the south end to Old Chestnut Road on the north end. In 2017 the ADT was 1100 south of Racine School Road to over 2200 at the intersection with Old Chestnut Road. The project will be constructed in three phases over three consecutive fiscal years.

Agency/Department: DPW-Roads/Bridges	Project Number: 52700
Project Title: Belle Hill Road and Appleton Road Intersection Improvements	Project Location: Elkton, MD
Project Description/Status:	Priority: 9

This project consists of improving the horizontal alignment of Belle Hill Road as it intersects Appleton Road. Although the road is truck restricted, trucks frequently attempt to make a right turn to head north on Appleton Road and run off the road, become disabled, and require police response and towing. The project will require full depth roadway reconstruction, stormwater management, and extensive utility relocations.

Agency/Department: DPW-Roads/Bridges	Project Number: 52657
Project Title: Replace Bridge CE0055 Belvidere Road over CSX	Project Location: Perryville, MD
Project Description/Status:	Priority: 12

Bridge CE0055 was built in 1976 and is a three span pre-stressed concrete adjacent box beam bridge with an overall length of 123.83 feet with an asphalt wearing surface placed directly on top of the beams, and a clear roadway width of 22 feet. The bridge carries over 1600 vehicles per day and that number is expected to significantly increase due to the continued development of Principio Business Park. The project will be a complete replacement with a new structure sized to meet current design criteria and anticipated future traffic demands.

The aging Central Garage facilities do not meet the current needs as they relate to Public Works. At the current time new light and heavy vehicle maintenance bays are required to meet minimum maintenance requirements. No expansion space is available. Also, some heavy vehicles can not be serviced in the current garage and must be serviced outdoors. The fuel pumps and tanks are approaching the end of their useful life. The proposal is to construct a new Central Garage facility on the west side of the scale house. These improvements are to be performed in conjunction with the redevelopment of the overall area including separate improvements to the Solid Waste Management and Roads Division's facilities. This work is proposed to be performed in phases.

Agency/Department: DPW-Roads/Bridges	Project Number: 52693
Project Title: Upgrade Roads Central Yard Facilities	Project Location: Central Landfill, Elkton, MD
Project Description/Status:	Priority: 23

The Roads Central yard has facilities in need of replacement or rehabilitation. These improvements are to be performed in conjunction with the redevelopment of the overall area including separately funded improvements to the Solid Waste Management Division and Central Garage facilities. This work is proposed to be performed in phases. Phase 1: Design of site work. Phase 2: Construction of the site work and design of the new facilities and temporary relocations; Phase 3: Construction of the new facilities (new shops, storage areas, truck wash building, and weld shop). Phase 4: Furbish and Move in to these facilities.

Agency/Department: DPW-Roads/Bridges	Project Number: 52025
Project Title: Theodore Road Street Improvements (274 to Ebenezer Church)	Project Location: North East, MD
Project Description/Status:	Priority: 24

The road has become significantly more traveled with increased residential development (3/04 ADT 2041). The road will be widened and drainage improvements will be completed. Horizontal and vertical alignments will be improved where possible. Project extends 13,000-15,000 linear feet from MD Route 274 to Ebenezer Church Road. Concept study will determine phasing plan for construction.

Agency/Department: DPW-Roads/Bridges	Project Number: 52699
Project Title: Offsite Wetlands Mitigation Projects	Project Location: Elkton, MD
Project Description/Status:	Priority: 38

Cecil County does not have an approved Wetland bank Site. Any project in the County that is required to do wetlands mitigation must either develop its own individual site or pay a fee-in-lieu. Development of individual wetland mitigation sites can be a timely and costly proposition often adding a year or more to the permitting process. The fee in lieu is sent out of County for use in developing wetland mitigation sites in other parts of the state. Building a wetland bank in County will allow the money to stay in Cecil County and will be advantageous for County projects, some portion may be made available (at a fee) for other development in the County. It will be environmentally beneficial for the County to develop wetlands that will improve water quality and habitat in the County. Initially the project will review current County property for mitigation opportunities. Other opportunities will be explored as opportunities arise. The intent is to develop several acres of mitigation area. This project may also provide Environmental Site Design credits for stormwater requirements on other County projects. The wetland bank may also provide stream restoration opportunities to satisfy the County's MS4 Permit requirements and Bay Restoration WIP goals.

Agency/Department: DPW-Roads/Bridges	Project Number: 52646
Project Title: Replacement of Rolling Mill Road Bridge, CE0073, over Northeast Creek	Project Location: North East, MD
Project Description/Status:	Priority: 44

On September 20, 2006 a vehicle struck the northeast diagonal of the steel truss of this bridge. The impact caused a complete failure of the bridge causing the bridge to collapse in to the Northeast Creek. It is proposed to replace the bridge with a single span bridge with a curb-to-curb width in order to reuse the existing foundations. The curb-to-curb width is estimated to be 16 feet.

Calvert Regional Park - Development

Project Location:
Calvert Phase III

Project Description/Status: **Priority:** 1

History

- Purchased by the State in 2008

Intent

- To complete and expand due to user demand and Sports Tourism growth as the first Regional Park in Cecil County.

Benefits

- Increased Physical Activity • Improved Health • Economic Revitalization
- Safe Family Environment • Environmental Education • Open Space Stewardship

Outcome

- Parks and open space improve our physical and psychological health, create strong stable communities, provide economic revitalization, and make our neighborhoods more attractive places to live, work, and play.

Phase I completed October 2015. Phase II completed October 2017

Agency/Department: Parks and Recreation	Project Number: 56019
Project Title: Bo Manor Synthetic Turf - Development	Project Location: Bo Manor High School
Project Description/Status: Priority: 3	

Map Location

History

- All Cecil County High Schools have, and continue to, play on natural grass surfaces which need renovating.

Intent

- To create an MOU with CCPS that will improve school facilities for all Cecil County residents and help regionalize Parks and Recreation programs.

Benefits

- Synthetic turf fields are safer, require less maintenance, are environmentally friendly, and extend daily and seasonal participation levels.

Outcome

- To provide safer, more consistent playing surfaces. This will increase physical activity, promote healthier lifestyles, generate revenue, and create a partnership that will help regionalize Parks and Recreation efforts.

Agency/Department: Courthouse	Project Number: 58041
Project Title: Courthouse Holding Cell Renovations	Project Location: 129 E. Main St. Elkton
Project Description/Status:	Priority: 1
<p>Completely renovate existing Circuit Court holding cell, bailiff office and prisoner transport driver area to create: Three group Male Holding Cells, Two group Women Holding Cells, a separate Mens & Womens Monitoring Waiting Areas, two secure/confidential Attorney/Client Meeting rooms and a new Bailiff's Office. Several schematic designs have been reviewed resulting in the attached Concept Plan. Project is being procured using the GMP method and is in the final stages of design. Current costs to construct are estimated to be greater than budget. Adjustments are currently being made to design allowing the project team to feel confident the project will be able to be completed with the additional budget of \$160,000.</p>

Agency/Department: Courthouse	Project Number:
Project Title: Renovate Courtroom #3	Project Location: 129 E. Main St. Elkton
Project Description/Status:	Priority: 2
<p>The existing Courtroom #3, Judge's Chambers, Clerk's Office, Jury Deliberation Room and bathrooms at the Cecil County Courthouse total approximately 3,100 GSF. These areas will be reconfigured and renovated. The existing HVAC equipment will be removed and replaced. A new DOAS unit, to provide code required ventilation, and an AHU dedicated to Courtroom #3 will be installed on the roof of the building. Ductwork to and from the rooftop units will be routed through chases to the second floor to ceiling or soffit mounted grilles. Floor standing, 4 pipe fan coil units will provide space conditioning in the other rooms. Plumbing fixtures will be replaced, but will reuse the existing and sanitary and domestic water piping. Fire sprinklers will be reconfigured, as required, to provide proper protection for the reconfigured rooms. The electrical service to the spaces is presumed to be adequate for the renovations. Electrical devices, data/IT jacks and audio/visual systems will be installed. New LED lighting will be provided in all rooms.</p>

Map Location

Project Title:
Retrofit Additional Space for Sheriff's Office

Project Location:
107 Chesapeake Blvd

Project Description/Status: **Priority:** 2

The initial planning for the retrofit of Suite 114 is to provide more space for Law Enforcement which involves moving the Criminal Investigation Division and Sex Offender compliance office into the new space. The new area will provide space for additional interview rooms that will need audio/video recording equipment to comply with laws governing the interview process. The evidence room, armory and the processing lab need additional space. Once certain offices move into Suite 114 the vacated space will provide the much needed space for the storage system for Central Records. Initial retrofit project costs are calculated using a per square foot cost of \$150 for approximately 3,000 square feet of space. The project is being procured using the GMP delivery method and as it nears final design, the need for ballistic doors, high security bullet proof glass, and soundproofing in certain areas has increased the price to complete the most basic aspects the project is trying to achieve.

Project Title:
Road Overlay and Fencing

Project Location:
Cecil Co. Animal Services

Project Description/Status: **Priority:** 3

The proposed CIP project seeks to improve fencing and paving efforts at Cecil County Animal Services. Specifically, the project will repave the parking areas and driveways, create a walking path and replace an existing walkway. The estimated cost associated with paving the parking areas/driveways is \$66,000 and includes milling/grinding and re-grading the existing asphalt/tar & chip/etc. to make a homogeneous stable base, 2" asphalt base and 1.5" asphalt surface. The walking path is estimated to be approximately \$20,000 (may involve undercutting to find stable subgrade and excavating); and replacement of an existing concrete walkway is estimated to be \$4,000. 10-20% variance/contingency will be factored into the total costs estimates and design is estimated to be \$7,000. Fencing includes installation of a 470ft, 6ft high, chain link system with a 50ft double slide gate opening- Approx. \$16,750; installation of a 50X40ft dog play area (6ft high, chain link)-approx. \$5,900 and installation of a 50ft wide gate with electric opener-approx-\$16,800.

Agency/Department: Information Technology		Project Number: 61002			Map Location				
Project Title: Broadband Technologies Opportunity Prog.		Project Location: Various County Facilities, etc.							
Project Description/Status:		Priority:							
<p>The Broadband Technology Opportunities Program (BTOP) from the State of Maryland is intended to support the deployment of broadband infrastructure to connect "community anchor institutions" such as governments and public safety facilities. These networks help ensure sustainable community growth and provide the foundation for enhanced household and business broadband internet services. Entities to participate in the project are the CCPS, Cecil College, Cecil Public Library and CCG. The program envisions that user entities will pay certain annual operating costs and certain costs for connections. Related expenses are annual costs associated with the ISP, leasing of fiber space, equipment purchases, creation of hub sites at Bo Manor Middle/High and Perryville Middle Schools, switches, firewalls, backup generators, and uninterruptible power sources. Total project assumes \$969,600 in capital equipment at CCPS, Cecil College, Cecil Public Library, and CCGOV, as well as an annual amount due for managed services of \$329,620, split four ways. Project is in close out phase.</p>

Project Title: Construct Elkton West Sanitary Sewer Sub. **Project Location:** Elkton, MD

Project Description/Status: **Priority:** 2

This project provides for the design, ROW, utility relocation, and construction of initial facilities (i.e., pump stations, force mains, gravity sewer, etc.) to serve this new service area. Marley Road (Phase I) and Mill Run (Phase 2) sewer extensions are currently in construction. Once construction of Phase 3A and 3B is complete FY 2020/2021, County sewer service will be provided along the Route 40 corridor within the Elkton West Service Area from Route 279 to Marley Road. Future phases include Phase 3C to serve the Triumph Industrial Park, Phase 4A/4B that will expand the Mill Run collection system, Phase 5 along Old Philidelphia Road, Phase 6 along Blue Ball Road, and Phase 7 to serve potential development south of the I-95/Route 279 interchange.

Project Description/Status:		Priority: 24	
<p>This project will construct a sewer collection system and waste water treatment plant, force main, and gravity sewer to the Crystal Beach Community and decommission on site failing septic systems. The project will include Buttonwood Beach Camp, Elk View Shores, White Crystal Beach Camp, White Crystal Beach, and Crystal Beach Manor. Additionally this project will improve water quality, eliminate potential health concerns, earn nutrient credits for NRAWTP expansion, and help meet the nutrient TMDL (total maximum daily load) for the Elk River. The new small package wastewater plant will provide ENR level treatment (approximate capacity of not more than 250,000 GPD).</p>

Project Title:
Expand Landfill Gas Collection Control System

Project Location:
Central Landfill

Project Description/Status: **Priority:** 1

Future expansion of the Landfill Gas Collection System including new collection wells and transmission lines to maintain the efficient collection of Landfill Gas and to control emissions/odors from the landfill disposal areas. Phase 5 is planned for construction when waste reaches an approx. average elevation of 265 unless LFG odor or other operational problems create a need to perform the project sooner. Current waste elevation is between 240 - 250. Phase 5 is the final phase of expansion in the existing waste disposal area (i.e. cell 4/5).

As the landfill expands and incoming waste volume increases, it will be necessary to upgrade and expand the existing facility and infrastructure that support landfill operations. The current office is a modular building inadequately sized and with limited life expectancy. The existing maintenance building is deteriorating due to age and inadequately sized to perform maintenance of the current landfill equipment. As a first step to this project, 3-phase power was brought into the Central Yard facility in FY15. Subsequent phases will include design and construction of utility relocations, site work, demolition of existing structures, and construction of a new SWMD facility. This facility will include a new office bldg., staff areas and break room, a new or upgraded maintenance building and maintenance shops. In FY20 an Area Development Plan will be prepared to better define the project scope and construction phasing.

Agency/Department: DPW-Solid Waste	Project Number: 53029
Project Title: Construct Horizontal Landfill Expansion	Project Location: Central Landfill
Project Description/Status:	Priority: 3

Due to diminishing disposal capacity at Central Landfill and increasing population growth and waste generation in the County, the landfill must be expanded. In April 2014, the County completed a multi-year 5 phase permitting process and received a refuse disposal permit allowing an approx. 67.6 acre horizontal expansion of the landfill disposal area resulting in a total of 124.8 acres of permitted disposal area at Central Landfill. The expansion is proposed to be performed in several construction phases. The project will create six (6) new disposal cells with a total disposal capacity of approximately 16.6 million cubic yards and is projected to extend landfill life to 2075. Cell 2 is the next disposal cell proposed to be developed following utilization of the existing cell 4/5 airspace. Cell 4/5 is currently projected to reach capacity in July 2025. DPW has targeted completion of Cell 2 construction by July 2023 to provide 2 years of reserve capacity. Future cell construction will occur over time as additional disposal capacity is needed.

Agency/Department: DPW-Solid Waste	Project Number: 53033
Project Title: Construct Landfill Final Cover Area A	Project Location: Central Landfill
Project Description/Status:	Priority: 4

In accordance with the Landfill's Refuse Disposal Permit, MDE requires that final cover be placed over waste disposal areas that have been completed (i.e. reached permitted elevation). Area A will be the first of 7 areas that final cover will be placed as the landfill is built out between FY 2023 and FY2075.

Project Title: Construct Central Landfill Waste Receiving & Processing Station

Project Location:
Central Landfill

Project Description/Status: **Priority:** 6

This project consists of construction of a receiving facility suitable to pre-condition incoming waste including sorting out recyclables, contractor debris, and other waste streams that can be diverted from landfill disposal. Landfill space can be conserved and recycling/re-use improved by preconditioning incoming waste before disposal. The facility could also be used as a transfer station to haul waste and recyclables to other suitable offsite locations, if needed.
